

GROW	MONTAUK DAISY HANDMADE CEMENT TILE
HOUSE	
GROW	

DIMENSIONS: 8x8 inches
 DEPTH: 5/8ths inch
 WEIGHT: 3 lbs.
 TILES PER SF: 2.25
 LEAD TIME TO SHIP: 4-6 weeks
 (Large orders may have a longer leadtime)

Hand crafted with 100% natural materials, our cement tiles are suitable on the floor, on the wall, indoors and out. Traditional cement tiles should be sealed, and develop a desirable patina over time.

Made to last a lifetime, they are ideal for both residential and commercial projects. Tiles are completely recyclable, and are water-cured as opposed to fired.

Tiles are handmade to order, which means color can be customized to suit your space. Please see our 60-color palette for available custom options.

Native to the coastal regions of Japan, this daisy acquired its name by naturalizing along the windy shores of Montauk, NY.

If the common daisy symbolizes love, joy, and lightness of heart, then the hearty Montauk Daisy deserves its own wild interpretation of these traits: tenacious loyalty and steadfast devotion.

Pricing does not include freight shipping from Mexico. Please contact us for a customized quote. We recommend ordering 15% overage to cover any chipping or cracking that might occur during shipment or installation. All tile orders will be rounded up into a multiple of 12 to ensure boxes are correctly packaged. Installation and care guidelines: <https://growhousegrow.com/tile-installation-guidelines/>
